Overview of NOI Fellowship experience:

The long-term experiences gained during my internship have been implemented into my daily clinical practice, particularly in terms of patient approach and thinking about subsequent oncology treatment with a focus on quality of life. One of the most significant long-term experiences I gained is the opportunity for international collaboration and further international education. My experience with scientific seminars led by prestigious scientists (oncologists) has expanded my thinking about potential future developments, including international grants and opportunities. From a long-term perspective, I see the integration of treatment strategies from MSKCC (Memorial Sloan Kettering Cancer Center) into patient care in Slovakia as a major benefit for patient treatment.

Utilization of Gained Knowledge for the Development of Oncology in Slovakia:

- Implementing experience into daily clinical practice
- Sharing information and experiences among physicians
- Presenting the opportunity for other doctors to participate in international exchanges
- Developing educational capabilities through educational portals
- Establishing collaboration with physicians from MSKCC
- Providing the opportunity to consult unclear and complex cases
- Implementing treatment strategies in patient care in Slovakia
